

Web Front End Specialist

Remuneration: depending on experience

London office

It's time to get your life in gear!

Crossflow is ranked by the Financial Times as the 8th fastest growing company in Europe and are recruiting now for a range of roles to accelerate growth.

The business model, technology, and legal framework enables financial institutions to provide short-term working capital to the suppliers of large corporates across Asia, Europe, the Middle East and the UK.

We are looking for a skilled, motivated individual to transpose a website design schemes onto our web applications. The work requires some knowledge of web design, and a specialism in front-end implementation using Angular 11 and SCSS. Additional back-end skills with PHP would be very beneficial and priority will be given to candidates with such skills.

This is a rare opportunity to become a valuable member of the team when the business is accelerating to its next growth phase, creating exciting and exceptional opportunities for team players, who are passionate about customers and focused on achieving targets.

Crossflow is a business with highly commercially focused and serious engagement, with a very professional and motivated organisation, working to deliver success for their customers.

What we offer

- Points based remuneration package providing flexibility around work/life balance
- London (London Bridge area) base
- Competitive salary
- Option to take up to 6 weeks holiday a year
- Annual 1 week team building event at a premium location along with maybe a free surfboard
- Share options that could make you a millionaire
- Join us for cocktail hour once a week!

Key job duties:

- Create master design document based on current Website design to be applied globally to Web Application, to unify design across the company's properties.
- Apply design to Web Application written in Angular 10, using Bootstrap, Material Design or both
- Improve and iterate on design, UX and implementation over time, and add functionality to design as requested by Product Owners and Managers.
- Create user stories and implement new features on Web Application. Code the required interactions with a REST API for these features to a required spec.

- Document the user journey and the modified Web Application.

Candidate Profile:

- Good Communicator
- Strong English skills (conversational)
- Motivated, takes initiative and ownership of work
- Interacts well with stakeholders to produce desired results
- Versatile and willing to learn
